

Portfolio Benchmark Return Calculation

Effective End Date: 6/30/2025

Various indices are generally accepted in the investment community as a reasonable indication of the performance of a specific asset class or investment market, and are commonly used as a benchmark against which to measure the performance of your own portfolio. The tables below present weighted average returns for a portfolio comprised of several indices covering major asset classes and international markets. Three different portfolio allocations are compared. Annualized Benchmark returns assume continual rebalancing back to target portfolio weights.

Disclaimer: This report is produced by Page and Associates - Worldsource Financial Management Inc. for illustrative purposes only, based on information provided by Renaissance Investments, Global Insight, Thomson Financial, CPMS, Bloomberg, S&P/TSX Index Services, S&P Index Services, TSX, NYSE, NASD, and FTSE TMX. All index returns reflect total returns that track capital gains and assume that any cash distributions, such as dividends, are reinvested back into the index, and are reported in Canadian Dollars. Returns for periods longer than one year are annualized. Indices are unmanaged and one cannot invest directly in an index, so we have assumed investment expenses reduce the weighted average of the benchmark portfolio return by the specified percentage. Indices make no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. Indices make no representation regarding the advisability of investing in any investment vehicle and the decision to invest in any investment vehicle should be made considering the risks associated with that investment vehicle. All index returns reflect total returns that track capital gains and assume that any cash distributions, such as dividends, are reinvested back into the index, and are reported in Canadian Dollars. Returns for periods longer than one year are annualized. Indices are unmanaged and one cannot invest directly in an index, so we have assumed investment expenses reduce the weighted average of the benchmark portfolio return by the specified percentage. Indices make no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. Indices make no representation regarding the advisability of investing in any investment vehicle and the decision to invest in any investment vehicle should be made considering the risks associated with that investment vehicle.
